UBC FOOD SYSTEM
PROJECT

Liska Richer & David Gill
UBC Food System Project

Vision
“UBC is committed to a just and sustainable food system, inspiring collaborative action in all that we do to catalyze global change”

Mission
To serve as UBC’s collaborative, cross-campus initiative that brings together partners in academics, operations, and research to further advance UBC’s food sustainability initiatives and food system.

1. To conduct a UBC food system sustainability assessment
2. To identify barriers that impinge on the ability of food system partners and collaborators to make desired transitions towards sustainability
3. To create a shared vision and consensus-based guiding principles of a sustainable UBC food system
4. To develop a shared model, opportunities and actions collectively deemed necessary to facilitate transitions towards UBC food system sustainability
5. To offer students applied learning, research and professional development opportunities for positive impact on ecological and human health
6. To positively impact the movement towards the sustainability of the larger British Columbia, Canadian and global food systems
ACTION TEAMS

Scope:
• Advance priority areas
• Contribute to operational policy development and implementation

Organizational Structure
• Student + Staff serve as co-chairs
• SEEDS strategic facilitator
