Summer 2020

The UBC Sustainability Initiative (USI) is pleased to offer current UBC graduate students the opportunity to work on funded sustainability internship projects. Successful candidates work under the mentorship of a partner organization, and are immersed in real world learning where they can apply their research skills and contribute to advancing sustainability across the region.

- Visit the Sustainability Scholars Program website to learn how the program works and to apply.
- Be sure to review the application guide to confirm your eligibility before applying.
- Applications close at midnight on Sunday February 2, 2020.

Research project title: A review of climate adaptation planning for transit agencies

Sustainability Goal or Operations Plan objective
Climate Leadership
Long Term Goal: Building Resiliency to Climate Change

Project description
The outcome of this project will be to support TransLink in developing a climate adaptation plan for transit infrastructure, infrastructure planning, and operations with a focus on assets and resiliency.

Scope of Work:
- Conduct a scan of climate adaptation plans from a select number of transit agencies around the world. Summarize the common elements of a climate adaptation plan for transit focusing on assets and resiliency.
- Conduct primary research (interviews) with a select number of transit agencies to understand the process undertaken, including resources and supportive policies required, stakeholders engaged/consulted, and timelines and milestones to develop the adaptation plan. Identify how resiliency is integrated within the adaptation plans. Determine what on-going processes are in place to implement, report back on, and update the adaptation plan over time.
- Identify resources available in Canada to transit agencies to support the adaptation and resiliency planning process.

Deliverables
Note that a final deliverable (either a full report or, if the report contains confidential information, an executive summary) is required by the end of the program (March 14, 2020). The deliverable will be archived in the online public-facing Scholars Project Library.

- A draft report, containing a summary of initial research results.
- A final report, containing a summary of research results, including a detailed report on interviews with stakeholders, complemented by a final presentation to key stakeholders.
- Recommendations as to which processes, resources and supportive policies might be most effective for TransLink to consider in its climate adaption planning, with respect to infrastructure, operations, assets, and resiliency.
- A final report [or Executive Summary] for the UBC Sustainability Scholars online project library.
Time Commitment

- This project will take 250 hours to complete.
- This project must be completed between May 4 and August 14, 2020
- The Scholar is to complete hours between Monday to Friday, 8 AM – 4 PM, approximately 18-20 hours per week.

Required/preferred Skills and Background

☑ Excellent research and writing skills
☑ Demonstrated interest in sustainability
☑ Familiarity with research methodologies and survey techniques
☑ Strong analytical skills
☑ Ability to work independently
☑ Deadline oriented
☑ Project management and organizational skills
☑ Familiarity with benchmarking methods and tools
☑ Comfortable interacting with strangers to conduct public/in person surveys
