

UBC ZERO-WASTE INITIATIVES

Here is how the current zero-waste initiatives have been performing from the circular economy data. We have focused on Operational Diversion.

2014 SORT IT OUT

Since the introduction of "Sort it Out". Diversion rates have risen from ~39.90% to ~43.90%. A total change of 4%.

2018

PLASTIC CUTLERY BAN

Between 2016-2018, the net change in diversion rose from 41.70% to 43.90%.

In 2021, this rate is still at ~2018 levels.

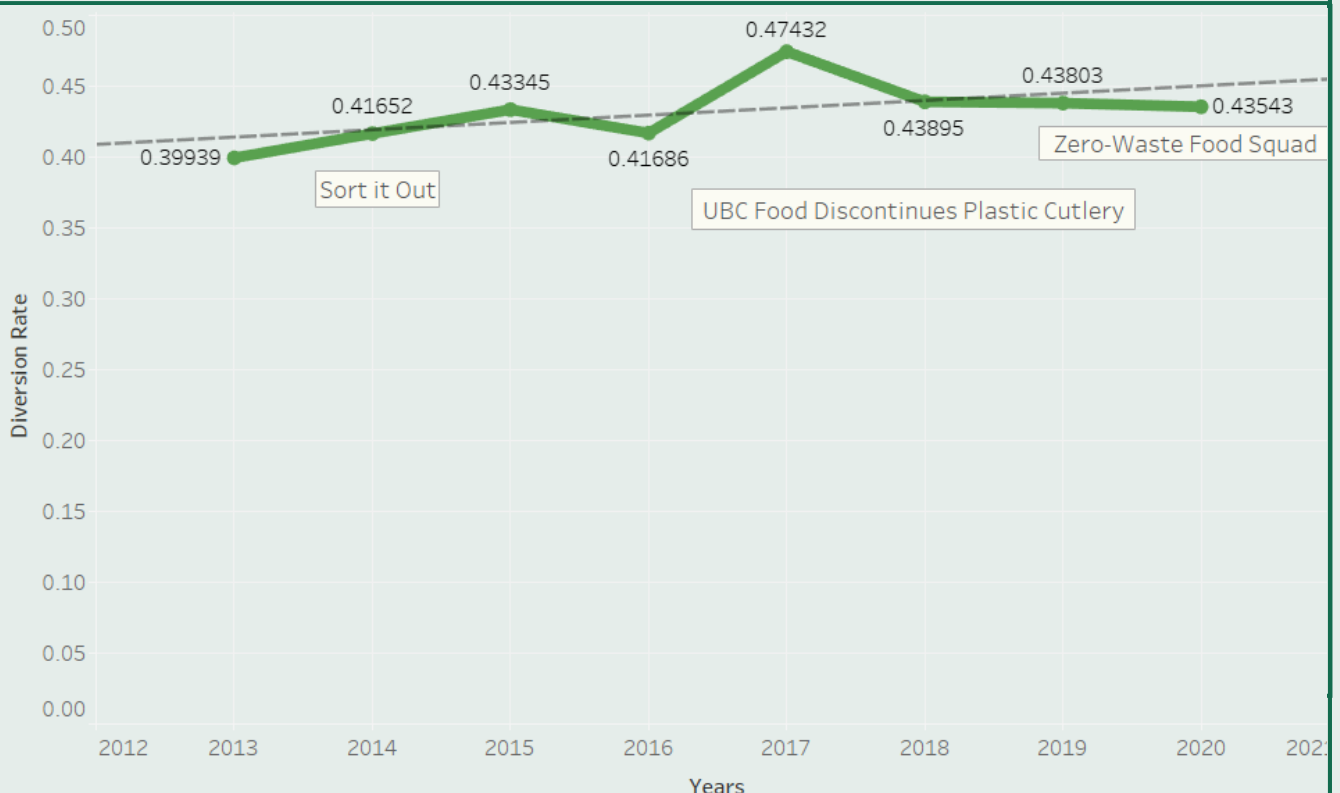

40% DROP

in Waste Generation since Sort It Out was instated in 2014.

2020 ZERO-WASTE SQUAD

There has been a drastic decrease in waste generation from the 2019~2020 fiscal year to the 2020~2021 fiscal year.

Note: We can not say whether any of these initiatives are causes for these drops + deviation in the data unless we have feedback about awareness from said initiatives.

Thank you!
