# Overview

- UBC has established ambitious goals for managing resource flows to and from the campus.
  - Climate change mitigation has provided one dimension for these activities
  - Water and its treatment another

Title: Chemistry Building, Ubc

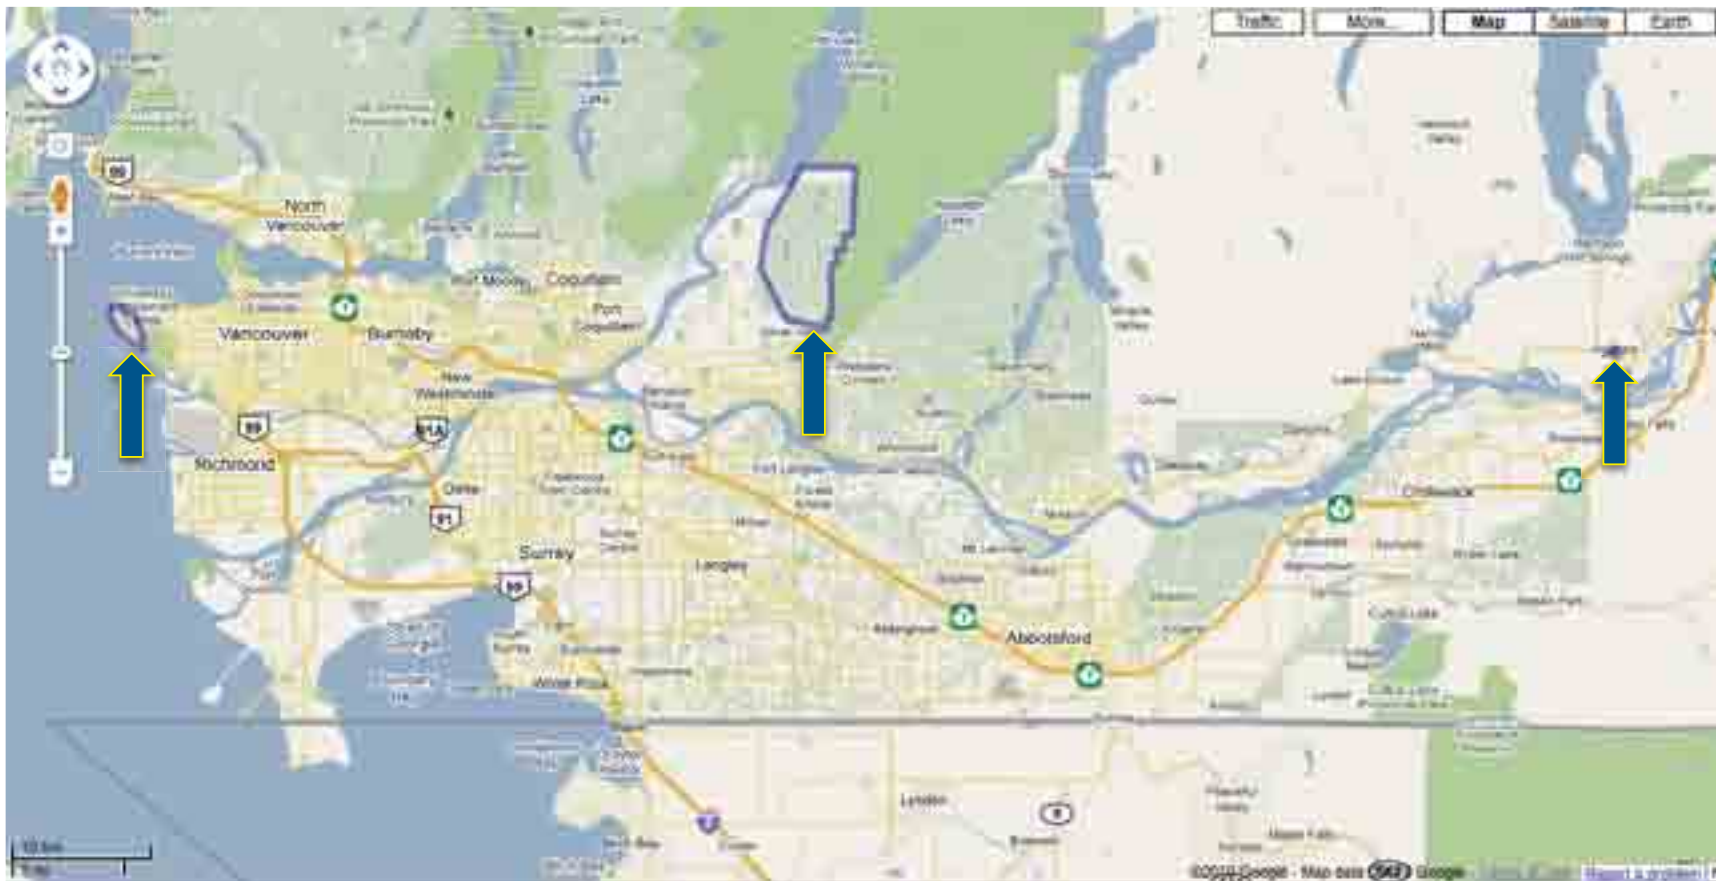

Fewer buildings,  
Closer to where we live,  
More virtual travel & Green Public Transit

# Let us consider a bigger lab!

# Bigger Picture, Better Options

- We can use energy in the waste stream from dormitories to meet their DHW and space conditioning needs.
- We can use biomass at MKRF for zero GHG electricity production and get equivalent electrons on campus.
- We have 500 animals at the Agassiz farm enough to produce 2% of campus methane demand and swap gas through Terasen.

And what will they think of our plan in 2110?
